

Simulation

**How many moments will it take
To realize this life is oh so fake
We are the writer, director and actor too
Our own experiences we simulate
It's true**

**There is no room for fear
in the world we create
We are divinely protected
and in control of our fate**

**We can choose to live in the mind
let it control our fears
Or can stay peaceful in the heart
as our ascension nears.**

**It is not always easy
but simple for sure
We just have to trust
& let our spirit explore**

**We are here for a reason
a choice we have made
So now is the time to not be afraid**

**We live in the here
and we live in the now
cherish each moment
and all experiences we allow.**

**Sometimes we think we are under attacked
We must always look at how we act**

**Are we fearful and sad
or just plain nuts
Where one door opens
sometimes another shuts**

**The signs and symbols are all around
If you stay in your heart
the answers are found**
