

Creation Source Light and Love

The one Source Energy divided itself in half in order to see a unique mirror reflection of itself.

Each of the 2 Source Energies then divided themselves into 6 unique energies, resulting in a combined total of 12 unique energies.

Each of the 12 Source Energies then divided themselves into 2 unique energies, resulting in a combined total of 24 unique energies.

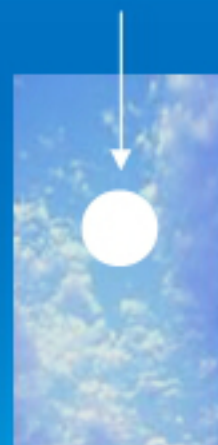

The 24 Source Energies decided not to split any further. They created the Creation Lightship where they now reside. The Creation Lightship is their Manifestation Center where they created all things that were born in the Light.

Creation Lightship

Creation's Manifestation Center Your Spirit Was Created Here

All Spirits created at the exact same time go to the same home base. While at the home base, each Spirit divides in half and the resulting two spirits are called Twin Flames. Each Twin Flame then chooses a place where it would like to incarnate (example: Planet Earth). A Spirit is created with the ability to reflect its experiences back to its Twin Flame and also to its home base.

The Source Energy is made of Pure Light and Love. It did not create the Dark Forces. Creation's Defense Ships do actual battles with the Dark because the Dark Forces try to take over the Light and its creations. This Dark Force does not go by Spiritual Law. It just wants to take Energy. It spreads false teachings, pain, and sorrow wherever it can find a foothold. Don't fall for their deceptions and give them your ENERGY!
