DW

Meet Dr. Charlie Ware, One of the
Only Experts in the World to Manage
Sickle Cell Disease Symptoms with
97% Effectiveness.

TESTIMONIALS

"I have had the pleasure of working with Dr. Ware for over 10 years and I strongly recommend him to my patients, primarily adolescents suffering from chronic pain syndromes. Chronic or amplified pain is best treated as a biopsychosocial phenomenon with multimodality therapy and Dr. Ware is an invaluable member of our treatment team. His practices, which include acupuncture, nutritional counseling and herbal therapies, have been instrumental in helping manage pain and in improving the quality of life of my patients and their families."

~ Dr. Lynn Meister
